What the Pros Know

Dust mopping prior to spray buffing will improve results by removing any dirt and soil that is on top of the floor finish.

Description

This product removes all black heel marks and dirt, replacing them with a brilliant shine that will actually upgrade the original gloss of the finish. Saves time and money because less frequent recoating is necessary, as well as extending time spans between stripping.

Directions

Wear safety equipment recommended on MSDS, place Wet Floor Signs and read all directions and cautions prior to beginning your work.

FOR SPRAY BUFFING: Remove all tar, gum, and excess soil from the floor. Spray a fine mist of concentrate onto the floor just prior to buffing.

DO NOT OVERWET.

Use a spray buff pad and buff to a high shine. Turn pad over or replace as necessary.
