What the Pros Know

Scrubbing and Recoating a floor is a cost effective way to extend the life of any floor finish. Ideal for any green floorcare program.

Description

This Scrub and Recoat Cleaner is a biodegradable, very low toxicity and VOCs, environmentally responsible floor cleaner specifically designed for the interim maintenance procedure of scrubbing and recoating without the use of harmful chemicals, such as: phosphates (promote algae blooms), EDTA (carcinogen) and NPE (harmful biodegradable intermediate). This is the ideal product for any type of floor maintenance program to help extend the time between restorative stripping procedures, saving time and labor. When used as directed, this Scrub and Recoat Cleaner aggressively removes embedded soils and scuffs in the top layers of floor finish, and prepares the surface for re-coating with minimal rinsing required. This low foam formula leaves a clean, film free surface, making it ideal for use in an automatic scrubber. Scrub and Recoat Cleaner can also be used to remove the factory seal from newly installed VCT flooring and is compatible with any green or traditional floor care program.

Wear safety equipment recommended on MSDS, place Wet Floor Signs and read all directions and cautions prior to beginning your work.
