Industrial Deodorant - Big D's little wick-equipped Industrial Deodorant has been keeping rooms odor free for over 40 years! This oxidizing deodorant works wonders in public restrooms, sick rooms, rooms smokers use, and little used or musty rooms. Big D's Industrial Deodorant can eliminate any odor from the source through a catalytic reaction which oxidizes odors wherever they meet.

Big D offers a complete line of products for thorough cleaning, disinfecting and odor control.

INDUSTRIAL DEODORANT

A 1.5 oz. bottle of Big D will last up to 45 days, depending on the ventilation conditions of the room. Where air movement is bad, it may be used in a motorized dispenser. The wick will remain wet as long as there is liquid in the bottle (and wick is not extended beyond the recommended height). The special plastic cap provided with each dozen ordered makes it possible to use the product as drops, directly on a source of odor, without spillage.

4 oz. wick bottles are made for use in large rooms and in big capacity heating/cooling systems. This deodorant will last up to 90 days.

ORDERING INFORMATION:

1.5 Ounce Size

No. 303 - Cerise No. 331 - Lemon
No. 307 - Natural No. 400 - Mint Fresh

Packed 12 per shipping carton (wt. 3.3 lbs.)
or 6 cartons in shipping case (wt. 21 lbs.)

4 Ounce Size

No. 310 - Natural
No. 320 - Lemon

Packed 12 per shipping carton (wt. 7 lbs.)
or 3 cartons in shipping case (wt. 21 lbs.)

Gallons - Fragrances same as 1.5 ounce

Packed 4 per shipping case (wt. 36 lbs.)

Also available in bulk.

DIRECTIONS:

Use 1.5 oz. Industrial Deodorant in rooms of 1500 to 4500 cu. ft. (a 15' x 20' x 10' room equals 3000 cu. ft.)

Use 4 oz. Industrial Deodorant in larger rooms and/or in big capacity heating and cooling systems. One 4 oz. bottle is recommended for every 10 tons or 4000 CFM. Depending on the design of the unit, the bottle may be placed inside or used close by an air intake point.

TRY THE DROP

TEST DEMONSTRATION:

Selling the Big D Industrial Deodorant is easy. Even the most skeptical prospective customer is convinced when you demonstrate on their own home ground. First you ask the engineer, custodian, housekeeper or purchasing agent to take you to the worst restroom (worst smelling) on the premises. Next you sprinkle just a drop or two of Big D on the floor if it is ceramic tile, marble or on an ash tray or saucer if it is vinyl or rubber tile, and wait outside for a few minutes to give the oxidation process time to take place. Then ask the person with you to step back inside and sniff for themselves the deodorizing job Big D has done. It will never let you down!
