

A00423 Crawling Insect Killer

Insecticides

Features

- Synergized Dual Active 0.10% Pyrethrin/0.02% Deltamethrin Next Generation Insecticide
- Broad Spectrum Insect Control for Industrial/Institutional Use
- Dual Action Mist/Stream Toggle Valve for Wide Area & Crevice Treatment
- Approved for Use in Food Prep & Food Processing Areas
- No Oily Residue or Unpleasant Odor
- Water-Based Formula, Non-Staining, Nonflammable
- Kills Carbamate & Organophosphate Resistant Cockroaches
- Keeps On Killing German Cockroaches for Up to 3 Months

Description

This product represents the next generation in aerosol insecticide technology. By combining 0.10% Natural Pyrethins with 0.02% Deltamethrin, the dual active system provides rapid knockdown and flushing action with a long term residual agent that can remain active up to 90 days. This low odor, water based formula is effective on a broad spectrum of crawling insects. In addition, the low overall toxicity of this new active ingredient allows the product to be used extensively in food prep and food processing applications as well as non-food areas. The low VOC content also allows for this product to be compliant in all 50 states. For ease of use, the product features a dual action mist/stream toggle valve for both broad area and crevice treatment without the need for the "always lost" extension tube. 20 net 16 oz can.

TECHNICAL INFO:		
Physical Properties	Appearance	Coarse Mist or Stream
	Color	White
	Odor/Fragrance	Very Light
	pH	NA
	Spray Pattern	Coarse Mist or Stream
Environmental Profile	Glycol Ether Content	No
	Biodegradability	No
	Chlorinated Solvents	No
	Green Status	None
	Recyclable Packaging	Yes
Regulatory Compliance	% VOC By Weight	14.5
	VOC Restricted Regions	None
	Food Processing Suitability	F2
	EPA #	10807-428
	Flammability per CPSC	NCAF
	NFPA Code 30B Storage Level	1
