Specifications are subject to change without notice.

The **SSS LAV-30 Large Area Vacuum** is a versatile large area vacuum cleaner that deep cleans large carpeted areas with ease. The wide cleaning path quickly cleans open areas such as large meeting rooms, hallways, ballrooms, lobbies and terminals. The LAV-30 on-board tool set provides the ability to clean from floor to ceiling with one machine. The hide-away 20 foot hose pulls out easily. Simply add the Turbo Brush for cleaning floor surfaces in and around obstacles; use the dusting and crevice tools for cleaning furniture, ledges, walls and ceiling fixtures. The low profile design allows the unit to clean under objects with a clearance height of 4.25". All of the tools easily store in the durable canvas caddy mounted to the handle.

Two 1 hp industrial motors create a deep cleaning action across the full cleaning path. The five height adjustments make it easy to adjust to different types of carpeting. The floating front suspension adjusts to changes in the floor contour and keeps the brushes at the optimum cleaning position. For large area vacuuming the SSS LAV is your best choice.
