

# Green-Cleaning Gamechanger

## Introducing 24 Hour Chemical-Free Sanitizing Power New Series I & Series II Ozone Stabilizing Technology

Now every Triple S O3 high-capacity comes with a Series I or Series II Ozone Stabilizing Module that extends the life of Aqueous Ozone's super clean, super-green chemical-free cleaning power from minutes up to 24 hours. Now you can fill your mop buckets, auto-scrubbers, spray bottles, carpet extractors with a powerful natural all-in-one Oxy cleaner that works on almost any surface, uses only tap water and 110v power and can give you a full shift of cleaning power. Now you can make the change to effective chemical-free cleaning and sanitizing easier; with no changes to your cleaning regimen, not costly training.

Water quality varies from location to location thereby causing variances in cleaning and sanitizing. One particular chemical may work well in Detroit but poor in Denver. Patented stabilizer technology guarantees the same performance from Biloxi to Bismark. Can your chemical do that?

Water can be 'dirty' when it comes out of the tap. It can contain high levels of chemicals, salts, metals and other impurities that inhibit the oxy cleaning process. As experts at turning water into Aqueous Ozone, this problem is solved with our new Ozone Stabilizing Technology.

Using a patented process based on proven scientific methods used to make ultra-pure water in pharmaceutical labs, each Series I and Series II Ozone Stabilizing Module takes any tap water - no matter how 'dirty' - then purifies and optimizes before it enters the main O3 High Capacity Unit. The result is Aqueous Ozone that lasts up to 24 hours.

### Aqueous Ozone (AO): Nature's Oxy Cleaner

Made naturally by sunlight, Aqueous Ozone (AO) eliminates dirt and germs by oxidizing them the same way strong chemical cleaners do. The only difference is that AO turns back into oxygen and water when it's job is done, leaving nothing behind but clean.

## STABILIZATION MODULE

Now get hours of cleaning power with the New Stabilization Module. Turns ordinary tap water into a long-lasting, natural Oxy cleaner and sanitizer using patented Aqueous Ozone technology that keeps more ozone in solution for longer periods.

### FEATURES

- Sanitizes and cleans for up to 24 hours\*
- Plug-n-play installation & operation
- Standard equipment
- 0-0-0-A HMIS Rating
- Works with any water
- No expensive toxic chemicals
- EPA, FDA, OSHA, UL, & CSA Compliant
- Compact, lightweight, durable
- Up to 5 gallons per minute flow rate

### BENEFITS

- A full shift of cleaning power
- Easy training, no change to cleaning regimen
- Sanitizing power & all-in-one cleaner
- As safe as it is effective
- Calcium, salts, iron not a problem
- Cuts costs & liability with more cleaning power
- Meets highest safety and performance standards
- Fits easily into small janitors closets
- Quickly fill mop buckets, scrubbers & extractors

Model Number	Dimensions	Flow	Rate	Sanitizing Time	Cartridge Life
LCA114K	11" x 10" x 23"	Continuous - 10 min.	Up to 5 gals/min	Up to 4 hours	Series I - 1,600 gals
LCA118K*	11" x 10" x 23"	shut off safety feature		Up to 24 hours*	Series II - 800 gals*

# O<sub>3</sub> High Capacity Chemical Free Cleaning System

The Triple S O<sub>3</sub> High Capacity chemical-free cleaning system turns ordinary tap water into Aqueous Ozone - a powerful natural cleaner, stain remover, deodorizer and sanitizer.

The Aqueous Ozone is made on-the-spot with continuous flow for mop buckets, carpet extractors and auto scrubbers - controlling germs while cleaning.

It provides residue-free performance for a longer lasting clean and low slippage on even the smoothest floors. Safe on natural wood and stone.

## FEATURES

- No expensive toxic chemicals
- Plug-and-play-design
- EPA, FDA, OSHA, UL, CSA Compliant
- Compact, lightweight, durable
- All-in-one cleaning, sanitizing & deodorizing
- No mixing, no rinsing
- Up to 5 gallons/minute flow rate
- Stabilizer included (Choose I or II)

## BENEFITS

- Cuts costs & liability with more cleaning power
- Installs and sets up in minutes
- Meets highest safety and performance standards
- Fits easily into small janitor closets
- Eliminates multiple chemicals & guesswork
- Increased productivity
- Quickly fill mop buckets, scrubbers & extractors
- Sanitizes and cleans for up to 4 hours

Item #	Model	Description	Flow	Flow Rate	Dimensions	Industrial Price
80005	O <sub>3</sub> High Capacity Unit with Stabilization Module Series I or II (choose one)	Chemical-free cleaning system base unit	Continuous - 10 min. shut off safety feature	Up to 5 gals/min	17.5" x 14.5" x 7"	\$2,500

### STABILIZATION MODULES OPTIONS AND REPLACEMENTS

Item #	Stabilization Module	Description	Cartridge Life	Cleaning & Sanitizing Efficacy	Dimensions	In-Use Cost	Industrial Cost
LCA114K	O <sub>3</sub> Series I Stabilization Module	Used to extend effectiveness of aqueous ozone - includes stabilizer	1600/gal	Up to 4 hours	11" x 10" x 23"	\$0.09/gal	\$75.00
LCA118K	O <sub>3</sub> Series II Stabilization Module	Used to extend effectiveness of aqueous ozone - includes stabilizer unit and filter cartridge	800/gal	Up to 24 hours	11" x 10" x 23"	\$0.19/gal	\$75.00

Tested to meet or exceed UL and CSA standards. EPA, FDA, TURI, USDA and OSHA compliant. Exceeds GS-37 standard.
